

A GREAT PLACE TO WORK

Insurance Commission of Western Australia

CAREER OPPORTUNITIES IN I.T.

The primary role of our Information Technology Division is to enable the Insurance Commission to fulfil its service objectives by promoting the innovative use of information technology and by providing support for the development, enhancement and cost effective utilisation of our systems and technology resources.

In order to meet current and future works program appropriately skilled and experienced people are sought in the following areas:

STAFFWARE/IPROCESS/TIBCO

The Insurance Commission is a major user of workflow and imaging technologies and we will continue to enhance their use and application over the coming years. We are also embarking on a major program of work to replace our current mainframe insurance systems with open standards applications which will have a significant workflow component.

NETWORK SYSTEMS ADMINISTRATOR TEAM LEADERS

In addition to experience in leading a small team, candidates will be experienced professionals with technical training in supporting network equipment, server operating systems and hardware, server virtualisation technologies and Java application servers.

APPLICATIONS DEVELOPER TEAM LEADERS

Candidates are required to have extensive knowledge of computer applications systems development, experience in object oriented software design as well as experience using Java AND C++ or C# as well as experience in leading a small team.

BUSINESS ANALYSTS

With multiple business process improvement projects underway and planned for future work, experienced Business Analysts are sought to assist in these projects.

In these roles you will ensure that our computer system applications meet both business and client needs to improve our service delivery.

In everything we do our core values are:

SIMPLICITY

TEAM WORK

ACCOUNTABILITY

INTEGRITY AND OPENNESS

RESPECT AND COMPASSION

IT PROJECT MANAGERS

Our Project Managers will be responsible for the development of overall project plans including Gantt charts and to subsequently manage IT projects on a day to day basis. Other responsibilities will include coordinating issues and managing their resolution; preparing communication programs; change control and team management.

SOFTWARE QUALITY ASSURANCE/SYSTEM TESTING PROFESSIONALS

The Insurance Commission currently utilises the Mercury software application to capture test plans and results and to assist in the quality assurance process and procedures. People with experience in developing system test plans and / or software quality assurance experience are required to work on our major IT projects and to assist in day to day testing and implementation of minor application upgrades, patches etc.
