Notes : These figures are for any person deemed partly or wholly liable for the crash, where determined. Liability is only determined if a personal injury claim ensues, so these figures only relate to crashes involving a claim.

There may be cases of multiple liability (e.g two drivers, each 50% liable) included in the above.

"Unspecified" includes untraced drivers involved in a hit & run crash.

Year indicates the CALENDAR year in which the crash occurred.

For the latest year, the figures are up to 31/03/2026.
