

Lodging a cyber risk claim

Cyber risk

RiskCover provides cyber risk cover and manages claims on behalf of the WA Government and its agencies.

This *Fact Sheet* guides WA Government agencies on how to lodge a Cyber claim.

RiskCover's cyber risk coverage

The cyber risk cover provides agencies with a risk transfer solution for key cyber risk exposures including first party losses such as loss of agency data and business interruption, and third party liability arising from the loss/release of clients' personal information or corporate information.

How to make a claim

Agencies can lodge a cyber risk claim by contacting RiskCover.

Consideration of a cyber risk claim

Each claim will be assessed according to the circumstances which make it difficult to give an accurate estimate on how long it will take RiskCover to make a decision. However, RiskCover will make every effort to assess the claim in a reasonable time frame once the claim has been lodged. Delays may occur depending on the nature of the incident and the availability of information.

Please see RiskCover's Product Disclosure Statement for more information on cyber risk cover.
